

Inquire about 100G optical transceiver module

Overview

The 100G transceiver module portfolio offers a wide variety of high-density and low-power 100G connectivity options for data center, enterprise and telecom application. It includes 100G QSFP28 modules, 100G CFP/CFP2/CFP4 modules, 100G DACs/AOCs and their breakout. In this guide, we provide a comprehensive, practical overview of 100G QSFP28 modules, covering their working principles, module types, key specifications, typical applications, and a step-by-step selection framework to help you make confident, informed decisions for your network. Even enterprise networks, carriers, and service providers are moving to 100 gigabits per second.
