Overview

Inspection of electrical equipment and tools according to Circular 33/2015/TT-BCT is the technical safety inspection of electrical equipment and tools, evaluating according to the process of safety level of equipment and power tools before being put into use . Electrical installations certification from SGS – helps you comply with national and international standards and ensure the reliable operation of your facilities. Whether you are a manufacturer or operator, you need to ensure cost-effective and safe use of your electrical installations and power. We have a network of experienced mechanical and electrical inspection engineers working at vendor sites throughout Vietnam. The Vietnam Register (VR) is a government agency under the Ministry of Transport of Vietnam, responsible for the state management of quality, technical safety, and environmental protection for vehicles, transportation equipment, and industrial products.
