

Installation location of the electrical distribution box for each apartment

Overview

Choose the right box based on environment (indoor/outdoor), load capacity, and durability. It takes the incoming power and safely distributes it to different circuits throughout your building. The size and its filling depend on the number of electrical appliances connected. Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. The location of light switches and sockets for electrical appliances, the correct installation of electrical wiring in the apartment is the key not only to comfort in everyday life, but also to a guarantee of safety from short circuits.
