Intelligent DC Arc-Fault Detection of Solar PV Power Generation

(DOI: 10.1109/JPHOTOV.2022.3166919) In a solar photovoltaic (PV) power generation system, arc faults including series arc fault (SAF) and parallel arc fault (PAF) may occur due to aging of joints or other

Grain combine harvester header profiling control system development

In this paper, an intelligent control method of the header height based on multi-sensor fusion is proposed, and a header profiling control system is developed, in order to

perform accurate,

A REVIEW OF INTELLIGENT HEADER TECHNOLOGY FOR GRAIN

By integrating advanced sensor technology, control algorithms, and mechanical structure optimization, intelligent headers achieve precise control over height and posture, significantly reducing crop losses
