

# **Introduction of Communication Power Supply System**

## Overview

---

Communications infrastructure equipment employs a variety of power system components. Power factor corrected (PFC) AC/DC power supplies with load sharing and redundancy (N+1) at the front-end feed dense, high efficiency DC/DC modules and point-of-load converters on the. Uninterruptible Power Supply (UPS) systems are crucial for maintaining uptime, preventing data loss, and protecting equipment from sudden power failures. According to the report of China Information and Communication Network, the market share of communication power supply is as high as 35%.
