

Is the EOC terminal box a router

Overview

EOC1121R4WL-R410 terminal device also can provide Wireless WIFI 11N router function, terminals can use wireless WIFI to access the internet. EOC1121R4WL-R410 satisfies the operator's requirement and supports 4 SSID in maximum. This EOC (Ethernet over Coax) terminal transmits Ethernet signals over coaxial cables. It allows network connectivity through existing coaxial infrastructure by using a coaxial connector for the coax network, and RJ45 Ethernet ports for connecting to local network devices. OVT-BC-CM-2000IE-W series is wireless EoC terminal device product, which can be used independently by placing in user's home, besides common terminal functions, it also has wireless broadband access functions that can support users' mobile phones, laptops, tablets and other wireless devices.

Is the EOC terminal box a router

EOC terminal----CNEOC300

CNEOC300 is an EoC (Ethernet over Coaxial Cable) Slave (CNU) for access network which is based on HOMEPLUG AV technology. This device can be uplinked to EoC Master (CBAT), and downlink to
