

Is the GX switch an optical port

Overview

Use a QSFP to SFP adapter (QSA) to convert one or more ports to 10G to connect the APICs. The switch can be configured to work as 10/25/40/50/100/200/400-Gbps offering flexible options in a compact form factor. The VIC 1225 module supports optical transceivers, optical cables, and switches with optical downlink ports (such as: Cisco Nexus 93600CD-GX switch). The Cisco Nexus 93600CD-GX switch (N9K-C93600CD-GX) is a 1-rack unit (RU), fixed-port switch designed for deployment in data centers.
