

Kenya Relay Protection Specifications

Overview

Specification: Model: JVRD-NK Monitoring circuit: L1, L2, L3, N Rated voltage: 300-500V AC, 50/60Hz Rated current: 3A Protection function: Phase failure, phase error, voltage imbalance, neutral line disconnection Display mode: Phase failure, wrong phase, normal 3 LED. Tronic Kenya supplies electrical accessories, LED lighting and switchgear solutions for homes, businesses and contractors. Explore quality cables, switches, MCBs, MCCBs and lighting products across Kenya. Our brand is dependent on automation and continuous power supply; high-quality relays are important to provide the safety of the operation and reliability of the system. In Kenya, PSR-22 modules are widely used in motor control centers, automation panels. The set shall provide a three-phase wye connected voltage and three-phase wye connected current simultaneously, and two three phase wye current sources simulate magnitude, phase angle and frequency of all.

Kenya Relay Protection Specifications

Features and Technical Specifications for Mobile Cellular Devices

This specification defines the minimum features and technical requirements that mobile cellular devices sold in Kenya must meet. The requirements for Type Approval of mobile devices are summarized at
