

Liquefied Gas Splitter

Liquefied Gas Splitter

Microsoft Word

The two-tower system shown in Fig. 1(b) is most commonly used to produce an LPG mixture in the overhead and a natural gasoline product as the bottoms. In this system, the deethanizer must

Dividing wall columns for gas plants

Uniting wall columns in FCC unit gas plants Figure 5 shows a traditional FCC unit gas plant. The process scheme primarily consists of absorber/stripper columns, where the gases and the liquid in

Gas Liquid Separators for moisture and particle removal , Eaton

Eaton's gas/liquid separators are the perfect solution to remove up to 99% of all damage causing moisture and solid particles (10 microns and larger) in compressed air/gas and steam.

Design and performance study of a two-stage inline gas-liquid cyclone

For gas-liquid cyclone separator operating in series with the same structure, it is difficult to operate the second stage efficiently. Therefore, a new two-stage inline gas-liquid cyclone separator

QuickSplit™ Flow Splitters

QuickSplit™ Flow Splitters The QuickSplit Flow Splitter is very elegant in its simplicity. Split ratios are created by two or more fluid resistors that form a parallel flow path. QuickSplit Flow Splitters are

Direct numerical simulation of a transitional, cryogenic cavitating

DNS of a 3D cavitating mixing layer of LNG is studied using a HEM cryogenic cavitation solver. Mixing layer develops via transient interactions of vortex structures shedding by K-H

Guide to Different Types of Gas Separators

A gas separator is a pressure vessel used in the oil and gas industry to separate a well stream into gaseous and liquid components. What are the different types of gas separators?

[Read More](#)

Separation of high velocity wet gas by phase-isolation and split-flow

Separation technology of gas-liquid two-phase flow is very important, widely used in petroleum, chemical, electric power and other fields. In order to prevent entrainments by high velocity
