

# List of materials required for the primary distribution box

## Overview

---

You can find distribution boxes made from various distribution box materials such as steel, aluminum, PVC, polycarbonate, high-density polyethylene, and thermoset plastics like SMC. The key material requirements for distribution box are used in constructing an electrical distribution box play a crucial role in its durability, safety, and overall performance. Reasons for material selection: The strength and corrosion resistance of steel plate make it a common material for the box of the distribution box, and its good conductivity also. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1.
