

Local Area Network Cabinet DC Power Distribution Unit IP67

Overview

Intelligent power supply directly in the field • Field mounting reduces voltage losses due to long cable runs • No control cabinet required thanks to protection class IP67 • Outputs protected by electronic fuses • Output voltage adjustable, current for each output can be set. Phoenix Contact is thinking outside the control cabinet, delivering stable DC power right where it is needed with new TRIO IP67 power supplies! Phoenix Contact's IP67 power supplies give engineers flexibility to design applications to meet their specific needs by replacing power supplies located in. For power distribution requirements of medium to large data centers, Delta's Power Distribution Unit (PDU) is an optimal solution. The space-saving PDU is easy to move and adapt to the future demands of the data center. From compact, standard variants to more powerful versions with an IO-Link communication interface, you'll find a tough IP67-rated device that's ready to go to work in harsh environments.

Local Area Network Cabinet DC Power Distribution Unit IP67

DC Power Distribution Unit

The PDU series is designed to meet the needs of power distribution units of telecom access sites. It comes with an integrated controller that enables customers to read tenant-wise energy statistics as
