

Maximum Attenuation of 116 Optical Splitter

Maximum Attenuation of 116 Optical Splitter

What are Beamsplitters?

Optical components that create two beams by splitting incident light are beamsplitters. Read more about the different types of beamsplitters at Edmund

PLC Splitter and download the loss chart of PLC splitter

Optical splitters, including FBT (Fused Biconical Taper) couplers and PLC (Planar Lightwave Circuit) splitters, are common passive optical devices that

The Fiber Optic Association

The splitting of optical fiber depends on the PON standard (e.g. GPON - max 128, typical 32 or 64, and XG (S)-PON - max 256, typical 64 or 128), the maximum distance between OLT and ONUs (typical

[Read More](#)

PASSIVE OPTICAL SPLITTER

The optical splitter is the component with the largest attenuation in a PON system. The insertion loss is the fraction of power transferred from the input port to the output port.

[Read More](#)

PASSIVE OPTICAL SPLITTER

Based on the GR-1209 standard, the maximum allowable insertion loss for an optical splitter used in a PON system can be determined using the calculations outlined below.
