

Modular energy storage cabinets are low-temperature resistant and suitable for local area networks

Overview

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak shaving, and backup power.

Significant Decline in Battery Performance In cold environments, the chemical reaction rate inside the battery slows down significantly. The Modular ESS (Energy Storage System) series consists of energy storage with a high energy density and many cycles (8000) placed in cabinets and complete with temperature control and fire protection.
