

Multipurpose branch optical cable

Overview

Multi-purpose Branch Optical Cable is a versatile solution designed to meet the diverse needs of optical communication networks. Each subunit features a single-core optical cable with a 900µm tight-buffered optical fiber and aramid yarn for exceptional tensile strength and durability. If multiple standards need to be met simultaneously, special custom designs can be provided. Suitable for both indoor and outdoor applications, our assemblies come in various lengths and multiple cable diameters. Our extensive offering of fiber optic cables, connectors, cassettes, enclosures, patch cords, cable assemblies, cable distribution products and accessories deliver high performance, reliability, and scalability.

Multipurpose branch optical cable

Fiber Optic Cables

From indoor to indoor/outdoor to outside plant cables, we offer a wide range of fiber optic cables that are easy to install and provide high-density connectivity.

Multi-core Branch Optical Cable II (GJBFJV-II)

The multi-core branch cable II uses several simplex optical cables (made of 900um tight buffered fibre and aramid yarns) as optical sub-units. Sub-units are stranded together to form a cable core.
