

New 400g Optical Module

New 400g Optical Module

Optical Transceiver: 400G, 800G, 1.6T and the Leap to

Learn how 400G, 800G, 1.6T, and 3.2T optical transceivers--powered by silicon photonics and CPO--are updating AI, cloud,

Broadcom Showcases Industry-Leading Solutions for Scaling AI

Together, the 400G/lane optical DSP and 400G EML/PD enable optical module manufacturers to deliver cost-effective, low-power 1.6T transceivers, while laying the foundation for future 3.2T optical

High-Speed PCB Solutions for 400G and 800G Optical Modules

This guide explains the key PCB technologies, materials, manufacturing processes, and cost considerations for 400G and 800G optical modules in 2026.

[Read More](#)

LightCounting: The demand for 400G/800G optical

Currently, the demand for 4x100G and 8x100G optical modules exceeds the supply by 100%, and many customers have to wait until 2025 for

Introduction to 400G Optical Modules - KAD

As global backbone networks and hyperscale data centers continue to scale, 400G has become the inevitable direction for next-generation upgrades

[Read More](#)

Broadcom Delivers Industry's First 400G/lane Optical DSP for Next

Further, the adoption of 400G/lane optical interfaces lays the foundation for the eventual deployment of 3.2T module solutions with 400G/lane electrical interfaces for 204.8T switches.
