

Nexans optical fiber composite cable

Overview

Nexans' range of fiber optic cables includes products intended for data and telecommunications as well as industrial applications. Robust cables for national networks, city networks, rural networks and property networks, for installation indoors, outdoors, in ground pipes, in air systems and in. The HFC Nano range is designed to deliver exceptional fibre capacity in a compact, fully dielectric cable. Nexans commissions first phase of direct current (DC) microgrid pilot at its AmpaCity R&D Center in Lyon. Collaboration with key ecosystem partners accelerates development of next-generation building infrastructure.
