

Non-woven fabric sheet for optical fiber cable

Overview

Non-woven Fabric Tape is a high-performance wrapping material specifically designed for the cable and optical fiber industry. What are technical fabrics used for in cable and telecoms?

Why are nonwovens popular in the cable and telecoms?

What solutions can Nonwovens offer in cable and telecoms?

We work closely with you to enhance your products, with peerless levels of protection and safety across a range of applications. It is primarily made by polyester, manufactured through advanced needle punch or chemical bonded processes to ensure uniformity and durability. Non-Woven Polyester Tape (NANOVN), is a non-conductive or semi-conductive and non-woven tape which produced micro diameter polyester short fibers with Carding technology in natural white color or carbon coated black color.

Non-woven fabric sheet for optical fiber cable

Nonwoven Polypropylene: A Guide to Grades and

Nonwoven polypropylene is made by bonding fine polypropylene fibers into a strong, breathable fabric. You'll find several grades, like spunbond for
