

# **ODMEPON device 1G**

## Overview

---

ONU1710-1G is designed to provide efficient PON solutions for FTTH/O networks. It adopts small size and lightweight design, flexible in deployment and saves space. Versatile dual-layer tester purpose-built for PON service activation, with added broadband capabilities. The PPM1 leverages a unique patented technology that makes all the difference in the field. GEAPON ONU with 1 port GEAPON (SC/UPC), 1 port 10/100/1000Base-T (RJ45) Devices belonging to the ONU group are Optical Network Unit terminal subscriber equipment operating on Gigabit Ethernet Passive Optical Network (GEAPON, IEEE802. The ONU automatically switches into the corresponding PON mode by identifying the local OLT mode to complete GPON/EAPON/XPON adaptive access. XPON SFP ONU 1G Stick Transceiver Features | Single fiber bi-directional data links asymmetric TX 1. 244Gb/s application with G/EAPON MAC function | SFP package with SC / UPC/APC receptacle | Single 3.
