

OPGW Optical Cable Testing Unit

Overview

Our machines are designed to ensure the highest standards of performance, reliability, and durability, featuring tensile testing for accurate measurement of tensile strength and elongation, environmental simulation to test durability and performance under various conditions, high. UNIVER SVT-1000 Optical Cable Sheave Testing Machine is designed to evaluate the ability of optical ground wire (OPGW), optical attached cable (OPAC), and all-dielectric self-supporting (ADSS) fiber optic cables to withstand bending around rollers or sheaves under a specified load during. Testing an Optical Ground Wire (OPGW) cable is crucial to ensure its integrity and performance, particularly because it combines the functions of grounding and optical communication. Independent fiber optic testing services for cables (OPGW, ADSS, OPPC) that enables you to choose reliable products and ensure your infrastructure meets or exceeds your expected design life.

OPGW Optical Cable Testing Unit

Recommendation ITU-T L.151 Installation of optical ground wire cable

It deals with the factors that should be considered in determining the characteristics of this type of cable, the apparatus that should be used, the precautions that should be taken in handling the reels, and
