

Odor from electrical distribution boxes in summer

Overview

The breaker box is the main distribution point for all electricity entering your home, and any unusual odor suggests that a component inside is overheating. A fishy odor emanating from your electrical panel, often called a breaker box, is not a normal household smell and should be treated as an immediate emergency. Here in this post, we focus on how your panel reveals early warning signs when its breakers are being affected. Our homes are full of electrical technology these days yet many have outdated wiring systems and fuse boxes. We've attended properties across Exeter and Devon where catching the problem early has prevented electrical.
