

Open the optical port of the Huijue switch

Overview

Step 2: Take out the optical module, ring and label up, the gold finger is facing down, Note that the right and the negative can not be reversed. Non-certified optical or copper modules cannot ensure transmission reliability and may affect service stability. Huawei is not liable for any problem caused by the use of non-certified optical or. HUAWEI S5700-24TP-SI-AC is a Gigabit Ethernet switch, the application layer is three layers, switch type is a cassette switch. Use the command display transceiver to view the optical module information of all optical ports, and use the command display transceiver interface interface-type interface-number to view the optical module information of a specific optical port.

Open the optical port of the Huijue switch

Troubleshooting for Optical Modules on Huawei Switch

When connecting switches through optical ports, pay attention to the following points:
The optical modules used on both ends must have the same wavelength. The
