

Origin of Spanish Green Laser Diodes

Overview

The active region of the laser diode is in the intrinsic (I) region, and the carriers (electrons and holes) are pumped into that region from the N and P regions respectively.

Origin of Spanish Green Laser Diodes

Laser Diode Colors

We offer a wide range of laser diodes from high-quality manufacturers. IR laser diodes, red laser diodes, green laser diodes, blue laser diodes, and violet laser

Laser diode

Overview Theory History Types Reliability Applications Common wavelengths Further reading

A laser diode is electrically a PIN diode. The active region of the laser diode is in the intrinsic (I) region, and the carriers (electrons and holes) are pumped into that region from the N and P regions respectively. While initial diode laser research was conducted on simple P-N diodes, all modern lasers use the double-hetero-structure implementation, where the carriers and the photons are confined in order to maximiz
