ZEKAN underground cable trays

ZEKAN underground cable trays have been developed as a succession of concrete trays and are used for routing cables and cable sheaths in

[Read More](#)

Evaluation of cable tray and conduit systems using the seismic

Cable tray and conduit systems for electrical cables are a common feature of industrial facilities. They have an excellent performance history in past strong earthquake, even though they

[Read More](#)

Seismic fragility analysis of suspended cable trays in civil buildings

The cable tray is a kind of non-structural component used to distribute the electric cable, which plays a vital role in maintaining the function of the building. Post-earthquake investigations

[Read More](#)

Performance-based optimum seismic design of cable tray system

Theseismic performance levels of cable tray systems are presented according to current seismic design codes. A performance-based optimum seismic design procedure for cable tray

[Read More](#)

Seismic analysis and design of electrical cable trays and support

Most cable trays in nuclear power plants are classified as seismic category I components. Current safety requirements dictate that all such components be adequately designed in order to
