### opto isolator

If both boards are at earth ground potential, or neither is, place the optocoupler on the receiver and use a twisted pair for the cable because

[Read More](#)

### General Question about and Optocoupler Board

That relay module gives you the option to use opto isolation and power the relays externally (the relay coils draw  $\sim 75$ mA each when active). You only have opto isolation if you remove

## **Optocouplers Selection Guide: Types, Features,**

Optocouplers are often referred to by their "output type"; for example, a phototransistor device might be called an optocoupler "with phototransistor"

[Read More](#)

## **ANO007 , Understanding Phototransistor Optocouplers**

In order to design a functionally robust and reliable application with optocouplers, it is essential to understand not only the device's main parameters and parasitic elements, but also their tolerances

[Read More](#)

## **Relay with Optocoupler problem**

This circuit is completely pointless. Besides it being full of mistakes, optocoupler functions as good as fifth leg for a dog. It does not isolate input from anything, therefore there is no point using

## **Help with (JD-Vcc) Optocoupler Relay Module**

Hello, I'm aware how a normal relay works. I'm familiar with how to use an n-Channel MOSFET with the Arduino. (I also build Box Mods). But I'm stuck

[Read More](#)

## **Can I use this optocoupler board to reduce EMI on**

It sort of depends. It will not be able to filter or reduce EMI. It just moves it to a different place. However, you can overcome the EMI with higher voltages and
