

# **Price Standard Table for Aerial Optical Cable Laying**

## Overview

---

Here is the 2026 benchmark for cost of laying fiber optic cable per foot by method: Open trench (lawn/field): \$0. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. Deploying fiber above ground on poles or towers removes the need for underground digging and is particularly useful when the ground is uneven, rocky or both. From labor expenses to installation methods and site-specific challenges, the total price can vary more than most people expect.
