

**ZTP Thermal & Power**

# **Rubber plug for switch optical module**

## Overview

---

Made of durable and soft silicone material, it tightly fits the SFP optical port slot, effectively isolating dust and impurities, and extending the service life of the SFP socket. OPSTRAN is the upgraded brand of Fibay, founded in 2014, it's a high-tech company providing high-speed fiber optic transceivers for data center, enterprises, switches and other networking devices. We own LAB facilities to meet EEPROM coding and writing requirements with various brands of the latest. All new switches come with little rubbery bungs that block up unused SFP ports, but since this old procure was in use, those bungs are gone.
