Mounting Holes**

## Overview

---

Fiber optic cable tags are essential tools for identifying and organizing fiber optic cables in outdoor and indoor environments. Designed to withstand harsh conditions, these tags provide a clear and lasting solution for marking cables, ensuring safe installation, maintenance, and. We offer embossed stainless steel marking systems with screw holes or fastenings for cable ties. Buried detectable & non-detectable warning tapes, high visibility reflective laminated labels & flexible line marker posts, soil markers, domed posts. Featuring 360° wrap-around printing, UV-resistant materials, and a snap-on design, these labels fit cables from 0. Keep your cables organized and clearly labeled with writable identification solutions.

## Safety marking strips for optical cables

---

### How do I select the right cable label or cable marker?

First of all, what requirements do you have for a cable label or cable marker? Or in other words: What requirements must be fulfilled? Basic aspect.

### How do I choose the right cable label size for heat shrink tubing or for markers and labels?

The first step is to determine which cable diameter you need for your application. Or when it comes to labelling or marking cables: what cable diam.

### How can I use wire labels with protective laminate?

A special feature is that most HellermannTyton protective laminate labels have rounded corners. This results in higher final adhesion of the protec.

### How can I select the correct printer and ribbons for specific types and materials?

HellermannTyton offers various systems that can print different types of material/labels. If you would like to know which product is the right one.

### Which bonding properties do cable labels have?

Basically, a distinction is made between the following two states: the initial bond, which occurs immediately after the label and surface have been.

### Why is the surface energy an important factor for the selection of the right adhesive?

---

If a surface to be marked is wet out with an adhesive, the surface energy is a decisive factor for the maximum achievable adhesive strength of the.
