

Second-box distribution box

Overview

Secondary distribution boxes, also known as sub-distribution boxes, generally serve specific power supply areas. These boxes have inner and outer doors, powder-coated exteriors, and are designed for safety and aesthetic appeal, with rainproof tops for outdoor work. 4kV to the distribution cabinet (primary distribution cabinet), then the outgoing line is led to the distribution box (secondary distribution box) in each building, and finally the outgoing line is led to the distribution cabinet. Let's make an example for clarity: A newly constructed residential area introduces a 10kV power line to a substation. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs.
