

ZTP Thermal & Power

Serbian Standard Optical Attenuator

Overview

An optical attenuator, or fiber optic attenuator, is a device used to reduce the power level of an optical signal, either in free space or in an optical fiber. The basic types of optical attenuators are fixed, step-wise variable, and continuously variable. The power reduction is done by such means as absorption, reflection, diffusion, scattering, deflection, diffraction, and dispersion, etc.

Serbian Standard Optical Attenuator

PRO-ATTN-STPC-5DB , Industry Standard , Fiber Optic Attenuators

This is a simplex SMF OS1 fiber optic attenuator, used in fiber optic links to reduce or attenuate optical power. This fixed value attenuator will reduce optical power by 5dB. It uses male to female ST
