

# Several optical modules on a 24-port patch panel

## Overview

---

A MPO Patch Panel, also known as a MPO Fiber Patch Panel, is a modular optical distribution frame that houses multiple high-density MPO Modules. Using the full line of UTP Z-MAX®, UltraMAX® and MAX modules (available separately), the panel can be configured for a variety of multimedia applications. The panel's shallow depth allows it to be installed within the majority of standard racks and wall-mount enclosures. Panduit offers an extensive selection of modular patch panels, with various styles and port densities and an assortment of labeling options making them ideal for any installation. Cisco is introducing a family of fiber management solutions with a debut of SMF and MMF patch panels. With our flexible inventory, we'll deliver the right products for your specific network requirements. It is suitable for standard 19-inch cabinet/rack installation, compatible with 8-core modules (Base-8), 12-core modules (Base-12), 16-core modules (Base-16, Base-8), and 24-core modules (Base-12, Base-8), allowing for arbitrary switching.
