

Should I use fiber optic cable or fiber optic cable for outdoor use

Overview

Sheathing and Durability: Outdoor fiber cables are designed to withstand harsh environmental conditions, including UV rays, moisture, and temperature fluctuations. Indoor cables lack this ruggedness but are more flexible and compact for use in controlled environments. Whether you're linking buildings, running broadband in rural areas, or building 5G infrastructure, the right cable matters. Indoor fiber optic cable is a cable made up of optical fibers that have been processed into a cable with a protective plastic jacket and sheath.

Should I use fiber optic cable or fiber optic cable for outdoor use

002ZDF-21W01M20 , ActiFi® Composite Cable, Loose Tube, Indoor/Outdoor
