

# **Specifications of horizontal cable tray tees**

## Overview

---

Horizontal Tees link three 10" straight channel sections or compatible transitional fittings, enabling the creation of a sleek and efficient horizontal branch within a fiber routing system. The product is verified as being authentic; however, this does not guarantee the condition or fit for purpose of the product. Equal tees, unequal tees and crossovers are available for light, medium and heavy duty cable tray systems with widths ranging from 50mm - 900mm. The cable trays from SILTEC are made of first-class stainless steel that prevents corrosion and ensures a good level of resistance.
