

**ZTP Thermal & Power**

# **Stacked Fiber Reinforcement Trays**

## Overview

---

Fiber-reinforced inlays provide cushioning and shock absorption – ideal for sensitive products. This involves sucking an aqueous fibre pulp made from recycled paper or cellulose into a mould and then drying it. With this tray, you save up to 15% in material costs compared to standard solutions with existing packaging technology. The stacking corners of the "THIMM ecoStack" tray ensure a high level of safety during stacking. Glass reinforced thermosets increase in impact strength as the temperature decreases. Molded Fiber Glass Tray Company is comprised of over 300 different material handling trays, containers and wash boxes for material handling and processing solutions in an array of industries, including chemical, rubber, metalworking, machinery, electronics, transportation and utilities. Commercial Totes, Trays, Fiberglass Boxes, Nest and Stack Containers, Perforated Trays, Stackable Containers, Stacking Bins, Stacking Containers, Storage Bins, Tote Boxes.

## Stacked Fiber Reinforcement Trays
