Standard configuration fault of primary distribution box

What is the general fault of the distribution box? How to

When the distribution box is in the whole process of application, it must be de dusted on time, mainly to ensure the cleaning of the distribution box. Secondly, it must

MO-201 Electric Power Distribution Systems

The failure of the normal source of a primary cable fault can be isolated and service restored by sectionalizing. Finding a cable fault in the loop, however, may be difficult and dangerous.
