

Steel for cable tray crossarms

Overview

Galvanized crossarms for cable trays are typically made of Q235 low-carbon steel via rolling. Price, we've been supplying the highest-quality crossarms for the overhead line electricity and telegraphic industries for over 70 years. Electrical Cross Arm is a vital component used in power distribution systems to support overhead power lines. It is typically mounted on utility poles and provides a sturdy platform for attaching insulators, conductors, and other electrical equipment.
