

Stocked fiber optic hybrid cable ADSS

High Quality Aluminum Housing with Compact Size

- Sturdy and Durable
- Anti-corrosion

Overview

All-dielectric self-supporting (ADSS) cable is a type of that is strong enough to support itself between structures without using conductive metal elements.

Stocked fiber optic hybrid cable ADSS

ADSS Fiber Optic Cables Types Prices & Technical

ADSS cable is a type of fiber optic cable that is strong enough to support itself between structures without containing conductive metal elements. Both single

AFL-ADSS® (All-Dielectric Self-Supporting) fiber optic cable is a non

As its name indicates, there is no support or messenger wire required, so installation is achieved in a single pass, making ADSS an economical and simple means of building a fiber optic network.

ADSS Fiber Optic Cable Specifications Explained

Explore the complete specifications of ADSS fiber optic cables, including structure details, mechanical performance, optical characteristics, and

[Read More](#)

What Is ADSS Fiber Optic Cable?

ADSS cable is loose tube stranded. Fibers, 250 μ m, are positioned into a loose tube made of high modulus plastics. The tubes are filled with a water-resistant filling compound. The tubes (and

All-dielectric self-supporting cable

Overview Construction details Accessories and installation Application issues

All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements. It is used by electrical utility companies as a communications medium, installed along existing overhead transmission lines and often sharing the same support structures as the electrical conductors. ADSS is an alternative to OPGW and OPAC with lower installation cost. The cables are designed to be s
