

Supplier s Special Optical Cable G 652D

Overview

AIMIFIBER supplies carrier-grade bare optical fiber for cable manufacturing, sensing, and laboratory use. 652D for metropolitan/access networks with low-water-peak performance (1260–1625 nm), or G. The Soft Tube Cable (STC) is a non-metallic, longitudinal water-protected outdoor fibre optic cable, designed for the construction of optical infrastructure networks (back-bones, distribution and access). Its primary innovation is the virtual elimination of the water peak attenuation around the 1383nm wavelength. Prysmian Group's Optical Fibre division has a 30-year history of service to the telecoms industry. All Dielectric Self Supporting (ADSS) Cable for a length span of up to 100 m with a capacity of 24/48 cores single mode ITU-T G. the cables that dtc offers are designed, manufactured, and tested according to international standards as follows. 652, 655, EIA/TIA 598B, IEC 60794-4-10, 60794-1-2, IEEE 1138, IEC 61232, 60104, 61089.
