

Thailand AM-modulated light transmitter

Thailand AM-modulated light transmitter

HFE0507_p62-64.qxd

Simple optical laboratory experiments often involve voice transmission or low rate digital information, such as Morse Code. It is easy to apply the modulation for either via control of the current to a laser

Amplitude modulation

Amplitude modulation (AM) is a signal modulation technique used in electronic communication, most commonly for transmitting messages with a radio wave. In
