The Development History of Fiber Optic Communication Systems

Optical Communication: Its History and Recent Progress

This chapter begins with a brief history of optical communication before describing the main components of a modern optical communication system. Specific attention is paid to the

This chapter provides a historical perspective on the development of optical communication systems. It covers concepts such as analog and digital signals, channel multiplexing, and modulation formats.

The History of fiber-optic communication

After a period of research starting from 1975, the first commercial fiber-optic communication system was developed, which operated at a wavelength around $0.8\mu\text{m}$ and used GaAs semiconductor
