

ZTP Thermal & Power

The GCS distribution box is stuck

Overview

Use the Pod annotations `gke-gcsfuse/[cpu-limit|memory-limit|ephemeral-storage-limit]` to allocate more resources to Cloud Storage FUSE (the sidecar container). Relevant GCSFUSE logs while doing `cp`: The logs stop being generated at this point, i. Doing `ls` from a separate terminal is also stuck, and the last GCSFUSE log statement. To use the Cloud Storage FUSE CSI driver and specific feature or enhancement, your clusters must meet the specific requirements. The most common reasons you'd see a timeout on a directory listing operation against a GCSv5 collection would be: 1) The path against which the listing is being attempted contains so many objects that the timeout window is exceeded before the listing operation can complete.
