

# **The distribution box is completely out of power**

## Overview

---

Be sure that the power distribution box has sufficient power provided to it. Long cable runs can result in a voltage drop, which can be solved by using a heavy gauge wire. When they start tripping, overheating, or making strange noises, it's more than just an inconvenience - it's your home's cry for help. Do not touch live parts, turn off the corresponding power switch to avoid the risk of electric shock.
