

Three-level distribution box household-specific model

Three-level distribution box household-specific model

How to configure household distribution box circuit breakers?

The circuit breaker switch in the household distribution box depends on the area of the owner's house in the community. There are 5/6 circuits for ordinary single apartments, 7/8 circuits for small

Sampling for household surveys

About this note This technical note covers household surveys with a focus on probability sampling, bias, and survey weights. This is about how households are selected in a representative way from a

[Read More](#)

Household decisions and intra-household distributions

The collective model is an attractive alternative to the unitary model because it allows researchers to consider households with multiple decision-makers without having to specify exactly how decisions
