

Village road optical cable line hanging height

Overview

In case of special sections, crossing obstacles or roads or railways, the pole height of 8m, 9m, etc. Over your garden, there is no minimum height but a general rule would be that nobody can reach up and touch it. Tensile Strength: Minimum 1,500N for short spans, up to 12,000N for long-distance ADSS cables. All workers should have proper training and personal protective equipment before being allowed to work. For loose tube and ribbon cable, the bend radius is specified at 20 times the cable diameter during tension/installation conditions and 10 times during static conditions (check the data sheet).

Village road optical cable line hanging height

Pole Height Policy , Amplex Internet

HWE prefers 60" clearance between the power neutral and communication lines on poles 40ft and larger. HWE's current policy when replacing poles is to provide a communication cable attachment
