

# **What are the consumables for fiber optic cable manufacturing**

## Overview

---

Each optical cable is constructed using a precise combination of optical fibers, strength members, buffer tubes, water-blocking elements, armoring, and protective jackets. Here is the extended technical table of all raw materials used in the fiber optic cable industry. Optical fiber cables are made up of three components: the core, the cladding, and the buffer. Roblon's long-term experience and knowledge of cable fibers and cable machinery offer our customers a wide range of benefits, as we hold the necessary expertise about both the manufacturing of the fibers and how to use the materials for cable manufacturing.
