

What is an **ATE** distribution box

Overview

This unit distributes and monitors power in multiple power forms for a variety of application and computing equipment. Designed and tested to various sections of 810, 167, 1399, and MIL-HDBK-217 standards. Automatic test equipment or automated test equipment (ATE) is any apparatus that performs tests on a device, known as the device under test (DUT), equipment under test (EUT) or unit under test (UUT), using automation to quickly perform measurements and evaluate the test results. Automated Test Equipment are integrated systems which automate the process of testing modules, systems, devices or products.
