ZTP Thermal & Power

What is the bandwidth of a 4-core optical cable

Overview

This means that the cable can transmit data over distances of up to 10 kilometers without the need for additional signal amplification at a speed of up to 10 gigabits per second (Gbps). 4 Core Optical Fiber Cable Specification Optical Fiber Cable 4 Core Key Features ● LC to LC or SC to SC ● Single-mode /multimode for option ● OM3 for multimode ● Optical Fiber 4 Cores Inside ● Compatible with all standard fibre optic equipment and connectors ● Stainless Steel sheathed and metal. The fact that OM2, OM3, OM4 and OM5 all have smaller physical core diameters enables higher bandwidth and longer distance transmission.

What is the bandwidth of a 4-core optical cable

4 Core Optical Fiber Cable Specification

931-0XXX-04-0 Single Mode 4-core Optical Fiber Cable XXXm 932-0XXX-04-0 Multiple Mode 4-core Optical Fiber Cable XXXm *Exact product code is subject to the cable length.
