

What is the smallest electrical distribution box on a construction site

Overview

An XS construction distribution box is a compact, portable electrical box designed for temporary power supply to equipment on construction sites, during renovations, or installation work. A construction site distribution board is a specialized type of panel used to manage and distribute electrical power on temporary job sites. Unlike residential or industrial panels designed for long-term installations, these boards are built for mobility, durability, and flexibility. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in.
