

What size fan is best for a network server rack

Overview

Guide to selecting fans in 40mm, 60mm, 80mm, and 120mm for 1U, 2U, 3U server racks, comparing counter-rotating vs single-rotor options using P-Q curves, static pressure, airflow, power, SPL, and depth constraints. Since server racks are built to high densities, the cooling demand is equally high. Choosing the right server fan is one of those small decisions that quietly determines uptime, performance, and energy spend. For most mid-sized server environments, redundant 120mm or 140mm brushless DC fans offer. ▼
Which fan is right for my situation?

When it comes to server rack fans, there are lots of different options depending on how much U space you have available. With various options available, from efficient fan kits to versatile enclosures, you need to know which ones will best serve your needs.
