

Where to put the fiber optic tray

Overview

For fiber optic cable, use horizontal finger style with front cover cable managers in a 1U or 2U footprint. There are 5 undrilled U-shaped Fiber Cable Input Holes reserved for flexible fiber installation. Keep in mind various methods or different trays to use, just depends on the layout but most should look like this. Since the need for higher data rates and effective communication gets more robust, the utilization of optical fibers has become increasingly widespread across multiple spheres of. It covers the most common components used in a fiber tray installation, but each installation is different and the unique circumstances and requirements of any given installation environme qualified technicians.

Where to put the fiber optic tray

Optical Cable Tray , Fiber Guide , Ducting , Raceway

Optical cable tray is a system designed to protect and route fiber optic patch cords, cable assemblies to and from network cabinets, ODF and other terminal devices.
