

ZTP Thermal & Power

Which department does the power distribution automation class belong to

Overview

The EEE department was established during the inception of the institute in 1995 as the department of Electronics and Communication Engineering (ECE). Primary and secondary distribution system layouts: introduction, substation layout, substation location, construction, and bus schemes, the rating of distribution substation, overhead and underground distribution networks, distribution line construction, distribution system line conductors;. The course adopts a cross-disciplinary approach to ensure that the learners understand site execution, testing and commissioning. Prepare switching orders that will isolate work areas without causing power outages, referring to drawings of power systems. With an increasing demand for skills in this field, the online course **"A Practitioner's Approach to Power Distribution & Automation"** offered by L&T EduTech on Coursera stands out as an excellent opportunity for anyone looking to start or advance their career in power systems. Distribution Automation Engineers focus on automating power distribution processes to improve efficiency and reliability.

Which department does the power distribution automation class be

Electrical Power Distribution

This course is part of A Practitioner's Approach to Power Distribution & Automation Specialization. Instructor: Subject Matter Expert. Gain insight into a topic and
